## What Is Your Maximum Financial Potential?

1. Are you wondering if you're doing the right things with your money?
2. Have a nagging feeling that there must be a better way than maxing out your 401(k), TSP or 403(b) and hoping it will all work out?
3. Are you frustrated with the returns on your investments or low interest on your savings?
4. Are you angry because you're doing exactly what the media guru's and some “financial advisors” tell you to do and it's not working?
5. Are you feeling confused and powerless because your IRAs or 401(k)s lost 20-50 percent during the last couple of years?

**If this sounds like you, maybe it's time to consider other options.**
